2025– 2026 HEAP Applications Available

The Home Energy Assistance Program (HEAP) is a federally funded program administered by the Ohio Development Services Agency's Office of Community Assistance (OCA). It is designed to help eligible low-income Ohioans meet the high costs of home heating. If you are eligible for assistance, the amount of your one-time HEAP benefit will depend on federal funding levels, how many people live with you, total household income, and the primary fuel you use to heat your home. In most cases, the one-time benefit will be a credit applied to your energy bill by your utility company (or fuel vendor). Stop by the Utility Office to pick up a copy of the application. For additional questions about the HEAP program call 1-800-282-0880 during regular business hours (7:00 a.m. to 5:00 p.m.) Monday through Friday.

Greenlawn Cemetery Records can be viewed by going to the Village of Versailles website and looking under the Residents & Visitors Tab. Select Greenlawn Cemetery under the drop down and scroll down to the middle of the page. A convenient QR code is available or click on the provided link. The link will take you to a map of the cemetery where you will be able to search the records by name and get an exact location of a burial. The website will also show plots available for purchase. For any questions concerning the Greenlawn Cemetery please call the Village Office at 937-526-3294.

Efficiency Smart has two programs that are currently underway:

1.) Appliance Recycling Rewards

Through September 30, residential electric customers can schedule a free pickup of a working refrigerator, freezer, dehumidifier, or window air conditioner and receive \$100 per unit recycled. There is a limit of four appliances per household, per year.

2.) Window Air Conditioner Promotion

Efficiency Smart has also tripled the rebate for window air conditioners to coincide with the appliance recycling promotion. Through September 30, residents who purchase an eligible ENERGY STAR-certified window air conditioner can receive a \$150 rebate. When combined with the \$100 incentive for recycling their old unit, this offer offsets the majority of the cost of a new, more efficient model.
